MORELOS COPPER COINAGE

In the Morelos copper issues that are usually seen, the rarity is in inverse order with the half real being the hardest to find and then followed in scarcity by the one, the two and then the eight. The rarest date is the 1811, followed by the 1814 and the 1813 TC. The 1812 and 1813 dates are those most often seen. These facts lead to the conclusion that the 1811 half real should have the highest value for this entire group.
